

mODa14

Sunday, June 14 2026

15:00 - 20:00 Check-in & Registration

18:30 - 20:00 Welcome reception

Monday, June 15 2026

08:00 - 09:00 Breakfast

09:00 - 10:30 **Henry Wynn's Legacy: A Tribute Session**

Organizer: Chiara Tommasi

Chair: Chiara Tommasi

Speakers:

Giovagnoli Alessandra (retired)

Working with Henry Wynn: the Quest for Orderings

Riccomagno Eva (University of Genova)

Working with Henry Wynn: from Fourier to Gröbner

Pronzato Luc (CNRS)

Working with Henry Wynn: Over 30 years of collaboration in a few slides (and photos)

Youssef Noha (The American University in Cairo)

Working with Henry Wynn: Henry's ASCM dream

Fontana Roberto (Politecnico di Torino - Dept. of Mathematical Sciences)

Working with Henry Wynn: From PhD Student to Co-Author, and Beyond

Müller Werner (TU Dortmund)

Working with Henry Wynn: a few words on ABCD

10:30 - 11:00 Coffee/tea break

11:00 - 12:30	Invited Session - Theoretical and methodological advances in probabilistic kernel methods Organizer: Anatoly Zhigljavsky, David Ginsbourger, Luc Pronzato Chair: David Ginsbourger Speakers: Bect Julien (L2S / CentraleSupélec) <i>Uncertainty functionals revisited: Concavity and Jensen's inequality (DPP)</i> abstract Karvonen Toni (Lappeenranta–Lahti University of Technology LUT) <i>Good and bad kernels</i> abstract Mojmir Mutny (ETH Zurich, Broad Institute) <i>Active Exploration via Experiment Design in Markov Chains</i> abstract
12:30 - 13:30	Lunch
14:00 - 15:30	General session A Organizer: - Chair: Christine Müller Speakers: Baur Pauline (TU Dortmund University) <i>Optimal Designs for Nonlinear Regression with Dependent Errors using Matrix Norms</i> abstract May Caterina (Universita' del Piemonte Orientale) <i>Optimal design of experiments for dynamic factors and functional responses</i> abstract Parker Ben (Brunel, University of London) <i>Design of Experiments on Networks for Autoregressive Models (DPP)</i> abstract Lane Adam (Cincinnati Children's Hospital) <i>Improving Efficiency with Relevant Subset Designs</i> abstract
15:30 - 16:00	Coffee/tea break
16:00 - 17:30	Invited Session - Computational Challenges in Optimal Design of Experiments Organizer: Harman Radoslav Chair: Darius Ucinski Speakers: Ahipasaoglu Selin (University of Southampton) <i>Optimal experimental design under linear constraints: a column generation framework</i> abstract Jones Bradley (Retired) <i>Unrestricted Bridge (U-Bridge) Designs</i> abstract Rosa Samuel (Comenius University Bratislava) <i>Removing nonoptimal points for D-optimal exact designs</i> abstract

18:30 - 19:30	Dinner
20:00 - 21:00	Board Meeting

Tuesday, June 16 2026

08:00 - 09:00	Breakfast
09:00 - 10:30	Invited Session - Sensor location for spatiotemporal processes Organizer: Dariusz Uciński Chair: Dariusz Uciński Speakers: Bertoglio Cristóbal (University of Groningen) <i>OED with k-space data: application to inverse hemodynamics</i> abstract Koval Karina (Heidelberg University) <i>Measure transport for Bayesian optimal experimental design</i> abstract Patan Maciej (University of Zielona Góra) <i>Maximin efficient sensor location for estimation of subsets of parameters</i> abstract
10:30 - 11:00	Coffee/tea break
11:00 - 12:30	Invited Session - Subsampling Organizer: Jesús Lopez-Fidalgo Chair: Jesús Lopez-Fidalgo Speakers: de la Calle Carlos (University of Oviedo) <i>Optimal subsampling in presence of model misspecification</i> abstract Stufken John (George Mason University) <i>Data subsampling strategies</i> abstract Wang HaiYing (University of Connecticut) <i>Antithetic Designs and Stratification for Subsampling</i> abstract Yang Min (University of Illinois at Chicago) <i>Subdata Selection for Measurement-Constrained Linear Regression under Model Misspecification</i> abstract
12:30 - 13:30	Lunch
14:00 - 15:30	Poster Session Deldossi Laura (Università Cattolica del Sacro Cuore - Milan) <i>Random-X prediction error under model misspecification</i> abstract

- de Vries Klazien** (University of Groningen)
Bayesian D-optimal designs for GAMLSS in psychological test norming [abstract](#)
- Eichhorn Julia** (TU Dortmund University)
Detecting structural variations between different concentration-response experiments [abstract](#)
- Filova Lenka** (Comenius University Bratislava)
Optimal Exact Designs of Multiresponse Experiments under Linear and Sparsity Constraints [abstract](#)
- Flournoy Nancy** (University of Missouri)
Results and challenges in estimation for dose-finding designs [abstract](#)
- Marshall Daniel** (Brunel University of London)
Experimental Design on Networks: Exploring Nonlinear Social Influence [abstract](#)
- Muñoz del Río Alba** (Universidad a Distancia de Madrid)
Efficient Isothermal Experimental Designs for Parameter Estimation in Predictive Microbiology [abstract](#)
- Reckermann Katharina** (Roche)
Design of Experiments (DoE) in Pharmaceutical Technical Development [abstract](#)
- Riccomagno Eva** (University of Genova)
Data-Driven Strategies for Detecting and Sampling Misrepresented Subgroups (DPP) [abstract](#)
- Rodriguez Diaz Juan M.** (University of Salamanca)
Optimal designs for drug detection in the human body and further applications [abstract](#)
- Sada Allo Maider** (Universidad Pública de Navarra)
Joint Estimation of Target Dose and Slope in Binary Response Models: A Geometric Approach (DPP) [abstract](#)
- Singh Arpan** (CTRU, University of Leeds)
Non-Orthogonal Factorial Designs for Trials of Therapist-Delivered Interventions: Allowing for Therapist Capacity, Availability and Turnover [abstract](#)
- Solinus Robin** (Ruhr-Universität Bochum)
Optimal Design for Spatio-Temporal Stochastic Processes [abstract](#)
- Somogyi Pál** (Department of Applied Mathematics and Statistics, Faculty of Mathematics, Physics and Informatics, Comenius University, Bratislava, Slovakia)
Computing optimal designs of experiments for multivariate-response models [abstract](#)
- Spangl Bernhard** (BOKU University)
Stratified sampling optimum allocation for fixed precision [abstract](#)
- Stadler Alexandra** (Johannes Kepler University Linz)
Improving AI Explainability through Design of Experiments [abstract](#)

Youssef Noha (The American University in Cairo)

Maximum Entropy Sequential Design with ML-II, INLA, and MCMC Updating: A Comparative Study (DPP) [abstract](#)

Zhu Hao (Johannes Kepler University Linz)

Amortized Predictive Expected Information Gain for Adaptive Path-Constrained Experimental Design [abstract](#)

15:30 - 16:00

Coffee/tea break

16:00 - 17:30

Invited Session - Model based design of experiments with applications to Pharmaceutical Industry

Organizer: Tobias Mielke

Chair: Tobias Mielke

Speakers:

Hooker Andrew (Uppsala University)

Optimizing clinical study designs for CAR-T cell therapy: Development of an efficient sampling strategy through optimal experimental design [abstract](#)

Leonov Sergei (CSL Behring)

Integrating Bayesian and Promising Zone Approaches in a Phase 3 Clinical Trial (DPP) [abstract](#)

Sverdllov Alex (Novartis)

Optimal Experimental Designs for Wiener Process Models in Clinical Research Studies (DPP) [abstract](#)

Roth Katrin (Bayer AG)

Design challenges for dose-finding studies in drug development - Part 1: Estimands and Intercurrent Events [abstract](#)

Schmelter Thomas (Bayer AG)

Design challenges for dose-finding studies in drug development - Part 2: Finding more than the right dose [abstract](#)

18:30 - 19:30

Dinner

Wednesday, June 17 2026

08:00 - 09:00

Breakfast

09:00 - 10:30

Invited Session - Design of experiments in the information age

Organizer: Holger Dette

Chair: Holger Dette

Speakers:

Schorning Kirsten (TU Dortmund University)

Optimal Designs for Drug Combination Studies [abstract](#)

Xiao Qian (Shanghai Jiao Tong University)

Batch-Sequential Maximum One-Factor-At-A-Time Designs [abstract](#)

Yu Jun (Beijing Institute of Technology)

Weighted Conformal Field Design for Sensitivity Experiments (DPP) [abstract](#)

Zhou Yongdao (Nankai University, China)

Sequential Experimental Designs for Kriging Model (DPP) [abstract](#)

10:30 - 11:00

Coffee/tea break

11:00 - 12:30

Invited Session - Sequential design methodology with GP and latent GP models

Organizer: Anatoly Zhigljavsky, David Ginsbourger, Luc Pronzato

Chair: Luc Pronzato

Speakers:

Eidsvik Jo (NTNU, Norway)

Adaptive spatio-temporal sampling with marine robots [abstract](#)

Friedli Lea (Technical University of Munich)

CRPS-Based Targeted Sequential Design with Application in Chemical Space
[abstract](#)

Gautier Athénaïs (ONERA)

SLGP-based surrogates for spatially dependent discrete outputs: modelling, uncertainty quantification, and data acquisition (DPP) [abstract](#)

12:30 - 13:30

Lunch

19:00 - 21:00

Conference Dinner

Thursday, June 18 2026

08:00 - 09:00

Breakfast

09:00 - 10:30

General session B

Organizer: -

Chair: Markus Hainy

Speakers:

Frieri Rosamarie (University of Bologna)

Combining information from adaptive experiments (DPP) [abstract](#)

Ronco Davide (Politecnico di Torino)

How Deep Learning can support the Steel wheel design: a practical case study
[abstract](#)

Strouwen Arno (Strouwen Statistics/PumasAI/KULeuven)

From Optimal Designs to Optimal Policies [abstract](#)

Tarima Sergey (University of Kentucky)

The effect of informative adaptation on properties of Bayes estimators [abstract](#)

10:30 - 11:00

Coffee/tea break

11:00 - 12:30

Invited Session - Industrial design of experiments

Organizer: Peter Goos

Chair: Peter Goos

Speakers:

Stallrich Jonathan (North Carolina State University)

An Optimal Design Framework for Lasso Sign Recovery [abstract](#)

Vazquez Alan (Tecnologico de Monterrey)

Can Large Language Models Generate Two-Level Fractional Factorial Designs?
[abstract](#)

WANG Yaping (East China Normal University)

Uniform projection designs under the stratified L2-discrepancy (DPP) [abstract](#)

12:30 - 13:30

Lunch

14:00 - 15:30

General session C

Organizer: -

Chair: Chiara Tommasi

Speakers:

Bailey Rosemary (University of St Andrews)

Semi-Latin squares and their extensions [abstract](#)

Malevich Nadja (Universität Münster)

Paired Comparisons Designed for Personnel Recruiting (DPP) [abstract](#)

Prus Maryna (University of Hohenheim, Germany)

Optimal Design for Multi-Environment Crop Variety Testing [abstract](#)

Rosenberger William (George Mason University)

A Framework for Two-Stage Enrichment Trial Designs (DPP) [abstract](#)

15:30 - 16:00

Coffee/tea break

16:00 - 17:30

Invited Session - Designs for networks

Organizer: Christine Müller

Chair: Kirsten Schorning

Speakers:

Koutra Vasiliki (King's College London)

Designing experiments on networks [abstract](#)

Lamberti Justin (TU Dortmund University)

Optimal Designs for Large Time-Dependent Networks (DPP) [abstract](#)

Müller Christine H. (TU Dortmund)

Optimal designs for the Kalman filter applied to electrical power distribution grids (DPP) [abstract](#)

18:30 - 19:30

Dinner

Friday, June 19 2026

08:00 - 09:00

Breakfast

09:00 - 10:30

Invited Session - Space Filling and MMD-based design

Organizer: Anatoly Zhigljavsky, David Ginsbourger, Luc Pronzato

Chair: David Ginsbourger

Speakers:

Chazal Clémentine (ENSAE, Paris)

A Computable Measure of Suboptimality for Entropy-Regularised Variational Objectives [abstract](#)

Kang Lulu (University of Massachusetts Amherst)

Robust and Sparse Generalized Linear Models for High-Dimensional Data via Maximum Mean Discrepancy (DPP) [abstract](#)

Pronzato Luc (CNRS)

Random and Quasi-Random Designs for Quantisation in High Dimension [abstract](#)

10:30 - 11:00

Coffee/tea break

11:00 - 12:30

Invited Session - Bayesian Design Optimization

Organizer: Werner Müller

Chair: Werner Müller

Speakers:

Overstall Antony (University of Southampton, UK)

General Bayesian optimal design of experiments [abstract](#)

Suzuki Yuya (Aalto University)

Approximation of differential entropy in Bayesian optimal experimental design
[abstract](#)

Hainy Markus (Johannes Kepler University Linz)

Sequential Bayesian Experimental Design for Prediction in Physical Experiments Informed by Computer Models [abstract](#)

12:30 - 13:30

Lunch
